## San Mateo County COVID-19 Data Dashboard

Case data up to and including October 26, 2020

Total Cases

11,198

R-eff

0.91

Total Cases by Day

Cases by Sex

- R-eff is the average number of people an infected person will infect  
- Represents rate at which COVID-19 is spreading  
- Value less than 1 means decreasing spread  
- Value greater than 1 means increasing spread  
Source: CovidActNow for 10/9, accessed via [CalCat](#) on 10/14

Total Deaths

159

Deaths by Sex

Cases by Age Group

Cases by Race/Ethnicity

New Cases by Day

Deaths by Age Group

Deaths by Race/Ethnicity

Because of limited testing capacity, the number of cases detected through testing represents only a small portion of the total number of likely cases in the County. COVID-19 data are reported as timely, accurately, and completely as we have available. Data are updated as we receive information that is more complete and will change over time as we learn more. Cases are lab-confirmed COVID-19 cases reported to San Mateo County Public Health by providers, commercial laboratories, and academic laboratories, including reporting results through the California Reportable Disease Information Exchange. A lab-confirmed case is defined as detection of SARS-CoV-2 RNA in a clinical specimen using a molecular amplification detection test. Cases are counted by date the lab result was reported. Deaths reported in this dashboard include only San Mateo County residents; death data last updated October 26, 2020.

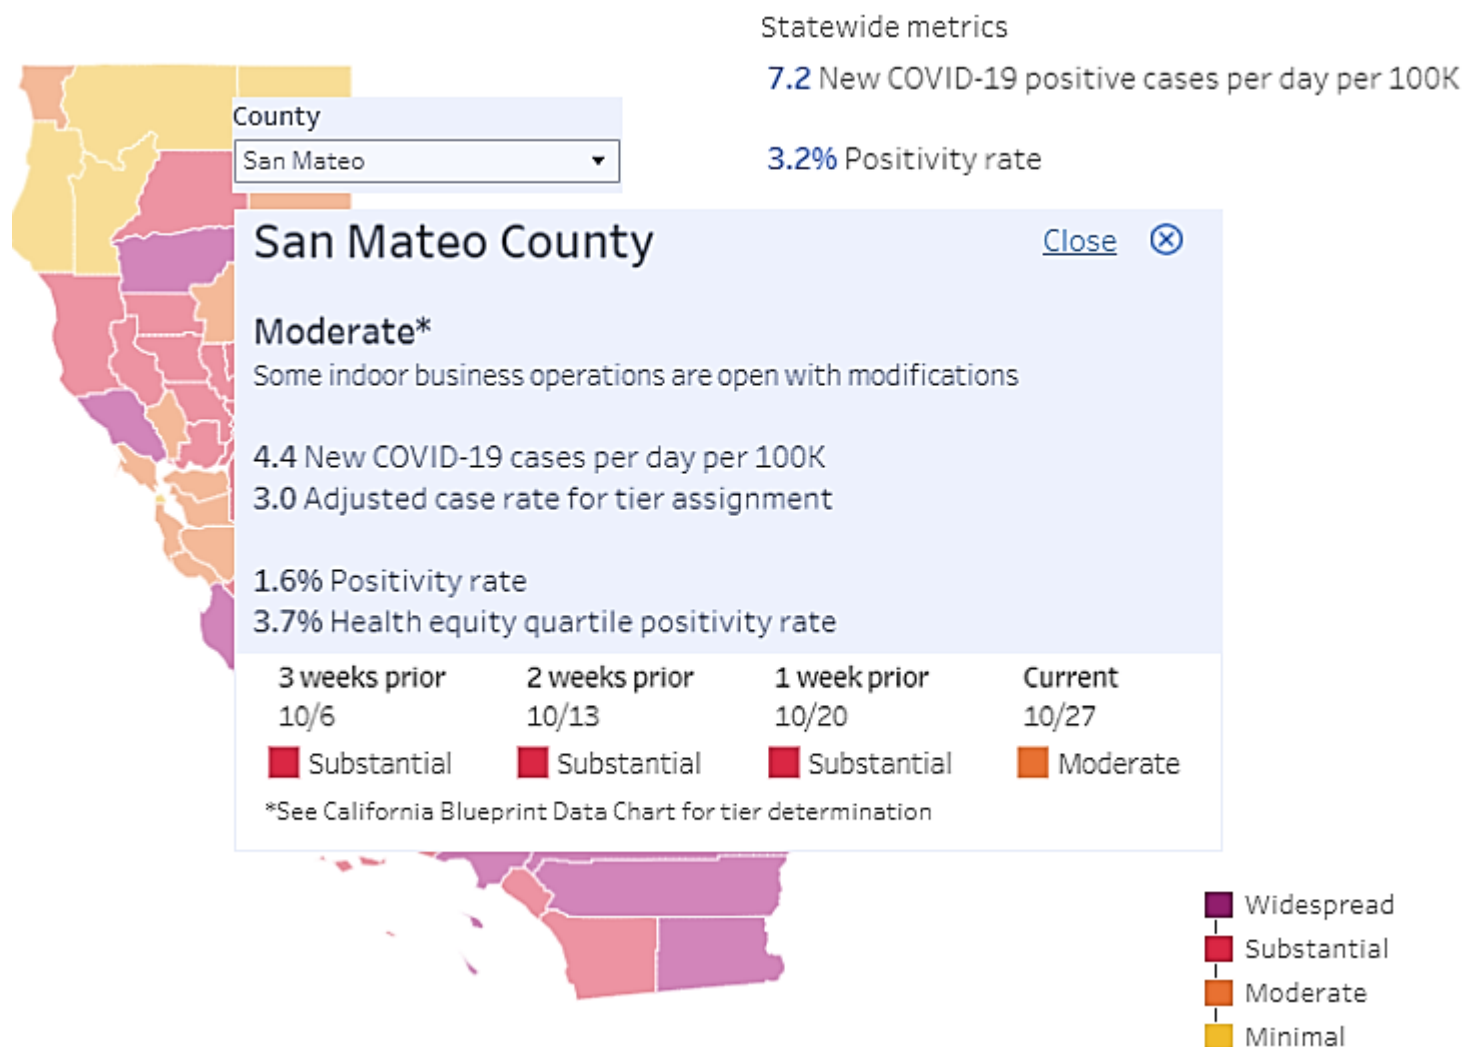

# BLUEPRINT FOR A SAFER ECONOMY

---

# Blueprint for a Safer Economy

# Blueprint for a Safer Economy

**SAN MATEO COUNTY IS AT**

**Orange**  
RISK LEVEL

## Allowed Indoors
